  - ▶ Improvements in the code formatter
  - ▶ New class wizard
  - ▶ Bug fixes, performance improvements

# How do you roll?

---

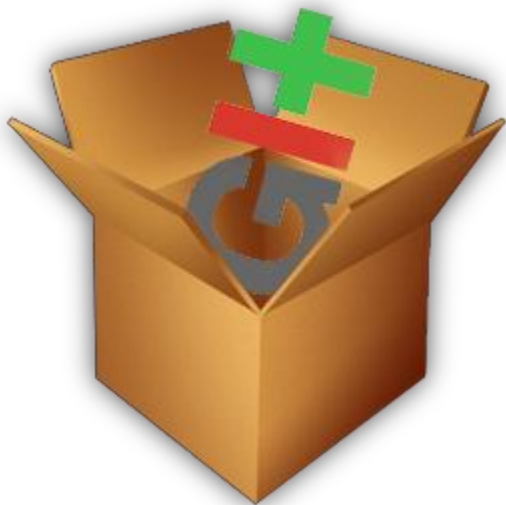

Big and Powerful?

Light and Nimble?

*Zend Studio 9 does both*

# Glimpses

A screenshot of the Amazon Web Services console. The top left shows the AWS logo and 'amazon web services™'. The top right says 'AWS Toolkit for Eclipse'. Below this are four tabs: 'EC2 Instances', 'EC2 AMIs', 'EC2 Elastic Block Storage', and 'EC2 Security Groups'.

A screenshot of the Zend Studio 9.0 welcome screen. The title is 'Welcome to zendstudio 9.0'. There are navigation links for 'Getting started with PHP', 'Tutorials', 'What's New?', and 'Video'. A central message says 'Discover and install new features to Zend Studio' with an arrow pointing to a 'SIGN UP FOR ZEND/PHP EMAIL UPDATES' form. On the right is a sidebar with a search bar and a list of plugins and features, including Amazon, Ant, Code Gallery, CVS, and various database and IDE integrations.
