

Zend Server On-Boarding

Find out how Zend customers ramp up and realize Zend Server benefits in less than a week with complete on-boarding services.

Zend Server is the platform of choice to build, deploy and manage mobile and web applications. With Zend Server On-boarding, you can accelerate and maximize the value of Zend Server in your organization. You have the confidence of knowing your implementation is correct, and your developers and operations staff can stay focused on innovating and releasing high quality apps.

Zend On-boarding is so efficient that most customers have a fully operational and optimized PHP application environment, powered by Zend Server, in less than a week. Our service is based on Zend expertise gained from thousands of successful customer deployments including many large-scale and business-critical enterprise applications in every sector of the global economy.

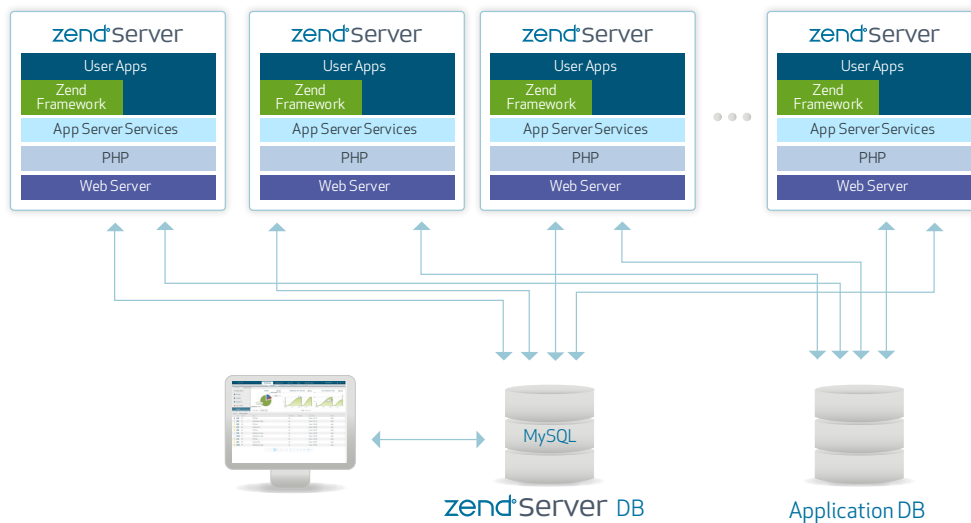

Complete On-boarding Service

On-boarding includes Zend Server installation, configuration, optimization and education. A Zend Professional Services consultant will mentor and guide your team to apply Zend Server best practices for running and managing your PHP applications for success.

- **Build a trusted environment.** We can optimize your PHP stack, configure your Web Server, and identify other areas to boost PHP application performance in development, testing and production.
- **Capture lasting value from your technology investment.** Our focused hands-on training will accelerate your Zend Server and PHP adoption so you can exploit the many advanced capabilities of the leading mobile and web application platform.
- **Promote collaboration.** Your development and operations teams will learn to use Zend Server's centralized management to tackle application issues more effectively — together. We'll optimize configuration and define rules for application monitoring and code tracing to help you simplify and speed up problem-resolution.
- **Deploy a high availability environment.** We'll help your team leverage Zend Server best practices for deployments targeted for simple or complex multi-server clustered environments.

Put your team on the fast track to ensuring application performance, scalability and availability, on premise and in private or public clouds, with Zend On-boarding.

Zend Server High Availability PHP Cluster

Customer Success

"The expertise of the on-boarding services as provided by Zend was of very high quality. Due to the fact that the Zend expert had knowledge about many areas, all of our departments were able get their questions answered. It was also very helpful to have the expert work with our developers on our test systems. By using some real examples they understand the Zend Server product much better."

Björn Rohs,
Manager Software Solutions
Enterprise Customer Solutions
Vodafone Libertel BV

Zend Professional Services

Go with Zend when you want to rapidly deliver modern web and mobile applications, on premise and in the cloud. Zend Services bring best practices into the entire application lifecycle so your development and operations teams can develop quality PHP applications with faster releases and higher availability.
